FPGA Programming Methods - An Overview

Tuesday, December 4, 2012 11:00 AM (25 minutes)

This talk will give an overview about the different programming methods available for FPGAs: Hardware Description Languages (HDL), Model-based Design (Matlab/Simulink), High-Level-Synthesis Tools (HLS) and IP-Cores.

Author: GOEHRINGER, Diana (KIT)

Co-author: BIRK, Matthias (Karlsruhe Institute of Technology)

Presenter: GOEHRINGER, Diana (KIT)

Session Classification: Talks TUE1
