A new geometric flow about cscK metrics in Kahler geometry

Thursday, October 13, 2016 2:00 PM (50 minutes)

In this talk I will give a new flow of Kahler metrics whose stable point is a constant scalar curvature Kahler metric, and discuss the long time existence. This is a joint work with Yuan Yuan and Yuguang Zhang.

Presenter: LI, Yi (Department of mathematics, Shanghai Jiao Tong University)
