From b-Tagging to the Autonomous Supply Chain –a career outside of Physics

Friday, November 25, 2022 9:30 AM (30 minutes)

Johanna is currently working as Product Director at Blue Yonder, a software company providing supply chain and retail planning offerings. Johanna completed her physics degree at the University of Mainz, and did her PhD at CERN working on the ATLAS experiment. After finishing her degree, Johanna started working for Blue Yonder as a Data Scientist, Project Manager and now as Product Director. She is currently responsible for Blue Yonder's supplier ordering solution in retail, from understanding customer requirements, working with User Experience designers on new workflows and implementing them together with the development teams. In her career she works with experts around the globe, to understand complex process workflows and to abstract them into a product solution.
