

Hands on Kubernetes

Wednesday, August 30, 2017 1:00 PM (5 hours)

The scope of this Workshop covers the architecture as well as the concepts of kubernetes.<p>You are taken on a journey from your first container startup to more complex setups inside the kubernetes cluster.<p>Basic understanding of unix and the cli is required as well as a ssh capable computer, since you need to connect via ssh to our learning environment.

Presenters: STEIN, Benjamin (INOVEX); PETRAUSCH, Christoph (INOVEX)

Session Classification: Tutorials
