

# C++ for Beginners

*Tuesday, August 29, 2017 2:15 PM (4 hours)*

This course aims to equip people of limited knowledge in C++ with both, a better understanding of the scope of C++ and practical, immediately useful hints to improve code with respect to correctness, readability and maintainability. The discussed topics are mostly adapted from the celebrated “Effective...” book series from Scott Myers.

**Presenter:** Dr HECK, Martin (KIT)

**Session Classification:** Tutorials
