Beewax: An optimized tool to enhance the performance of HIVE

Monday, August 28, 2017 4:40 PM (40 minutes)

The Beeswax tool can improve and optimize the storing and processing Big Data in HIVE using a set of modules that concern with 1-Translate advanced SQL queries to HIVEQL 2- Optimizing Multi-JOIN query in Map-Reduce jobs 3-reducing recourse consumption by avoiding long shuffling time 4- Reuse intermediate results, 5- concerns about Multi-Query Optimization.

Presenter: Dr KHAFAGY, Mohammed (Fayoum University)

Session Classification: Plenary
