

Session Program

October 31, 2017 to November 3, 2017

International Workshop on Medical Ultrasound Tomography

Poster session

Thu, November 2

3:00 PM

Poster session

Poster Session | **Location:** Lecture hall, Poster area

Comparison of two ray tracing methods for sound speed imaging

Location

Poster Boards

Contrast resolution enhancement of Ultrasonic Computed Tomography (USCT) using a wavelet-based method - Preliminary results in bone imaging

Location

Poster Boards

Fast reflectivity imaging in 3D using SAFT

Location

Poster boards

Minimum-variance beamforming for ultrasound computer tomography imaging

Location

Poster Boards

Piezofibre composite transducers for next generation 3D USCT

Location

Poster Boards

Improved temperature measurement and modeling for 3D USCT II

Location

Poster Boards

Visualisation of Ultrasound Computer Tomography Breast Data Set

Location

Poster Boards

Comparison of registration strategies for USCT-MRI image fusion: preliminary results

Location

Poster Boards

Measurement of the speed of sound, attenuation and mass density of fresh breast tissue

Location

Poster Boards

The USCT reference data base

Location

Poster boards

Object Classification and Localization with an Airborne Ultrasound Imaging System

4:00 PM

Location
Poster Boards
