# Conference Papers

- We are all interested in monitoring in one way or another
- It is wide extending from radio to TeV including a wide range of different instruments and analysis techniques
- It is very difficult to convince referees and funding agencies
- We would like to have a dedicated 'special issue' in Galaxies which summarizes the field and helps us in writing applications
- Therefore, we want articles more in a review style than as a classical proceeding → useful for your future articles as well

# Conference Papers

- If you feel uncomfortable writing a review (too much work, you don't feel confident) → Talk to us
- Many topics are similar or overlap → Let's use the free time during the conference to discuss that with your colleagues maybe you can even write the article together
- Do not feel hesitant to talk to us (Daniela, Michael and myself)  
→ We are willing help coordinating
- Time is too short! → Talk to us!

# Your talk!
