Amazon Cloud Workshop

In the last couple of years cloud computing has achieved an important status in the IT scene. The renting of computing power, storage and applications according to requirements is regarded as future business. This tutorial course gives an introduction of the basic concepts of the Infrastructure-as-a-Service (IaaS) model based on the cloud offerings provided by Amazon, one of the present leading commercial cloud computing providers.

Presenter: MAUCH (KIT), Viktor

Track Classification: Cloud Computing
