

## Data agregation in astroparticle physics

*Monday, June 8, 2020 11:30 AM (15 minutes)*

The extension of KCDC (KASCADE Cosmic-ray Data Center, <https://kcdc.ikp.kit.edu/>) project, which allows the user to access the data of the KASCADE, Tunka-133 and Tunka-Rex astrophysical experiments, has been deployed in the framework of German Russian Astroparticle Data Life Cycle Initiative.

The report will describe the organization of this service, its interaction with storages and aggregation services on Russian side (MSU, ISU), as well as the speed and scalability of this solution.
